

CKD (pre-dialysis) Registration Learning Objectives

Scenario 1: KCC Transfer (Learner has access to patient)

DESCRIPTION:	“I want to register a patient from another centre to my centre and I already have access to the patient in PROMIS.”
LEARNING OBJECTIVE:	Using a sample patient (Polly Pepper), the learner can successfully find the record in PROMIS, and then update patient information including centres, primary nephrologist, team members, and CKD registration information.

Scenario 2: KCC Transfer (Learner does not have access to patient)

DESCRIPTION:	“I want to register a patient from another centre to my centre. The patient is new to my centre, so I don’t have access to this patient.”
LEARNING OBJECTIVE:	Given a sample patient name (Peter Pumpkin), the learner can successfully gain access to the patient record in PROMIS by assigning the patient from another centre to the learner’s centre, designating the learner’s centre as <i>Renal-Primary</i> .

Scenario 3: End CKD

DESCRIPTION:	“I want to transition my patient from pre-dialysis to dialysis, so I can track treatment.”
LEARNING OBJECTIVE:	Given a sample patient (??), the learner can successfully close CKD registration and update patient record with dialysis status.
